

EverLink for Oil & Gas Operations Connectivity for Remote, High-Stakes Environments

Integrated vehicle and portable connectivity solutions designed to keep operations running across remote sites, pipelines, and field environments.

In oil & gas, downtime isn't just inconvenient— it's expensive.

- Remote locations with limited coverage
- Safety-critical operations
- Constant data and communication needs

Connectivity failure = operational risk

What is Everlink?

EverLink is a flexible connectivity ecosystem that provides reliable internet access and communications in virtually any environment—from permanent facilities and vehicle fleets to remote sites, field operations, and portable deployments.

What's Included

- Mobility: Vehicle-mounted connectivity system
- To-Go: Portable network-in-a-box
- LTE/5G + Starlink Mini
- Multi-network failover
- Rugged deployment-ready hardware

Why energy operations rely on Everlink

- ✓ **Continuous Field Operations**
Maintain connectivity across drilling, pipelines, and sites
- ✓ **Safety & Communication**
Ensure crews can communicate in critical situations
- ✓ **Resilient Multi-Network Connectivity**
Operate in remote and low-coverage environments
- ✓ **Real-Time Data Access**
Keep systems, reporting, and monitoring online

Use Cases

**Pipeline
monitoring**

**Remote drilling
sites**

**Field
inspections**

**Mobile
operations**

Keep operations running—no matter how remote the environment.

**Keep Operations Running — No Matter
How Remote the Environment**
