

CPR³ Field Ops Center — Mobile Command & Communications Platform

One device. Total operational visibility and control.

CPR³ Field Ops Center keeps crews, dispatch, and leadership connected in real time. This **all-in-one platform** unifies voice, messaging, alerts, location visibility, and hotspot connectivity on a single device powered by the **T-Mobile 5G network**. Each deployment can be **fully customized**, allowing organizations to configure the apps and operational tools their teams need — **improving** coordination, productivity, and overall operational performance.

Key Features

- ✓ Unified communications in one device
- ✓ Real-time crew visibility and alerts
- ✓ Integrated 5G connectivity for field operations
- ✓ Cloud dashboard for multi-location oversight
- ✓ Pre-configured workflows for dispatch and field teams

Field Service Benefits:

- Coordinate crews and vehicles in real time
- Improve response speed and operational efficiency
- Increase accountability across every job site
- Reduce delays through faster team communication
- Reduce crew downtime and operational delays
