

Rugged Devices Built for Work. Connectivity Built for Everywhere.

**Keep your frontline teams productive, connected, and supported
— no matter where the job takes them.**

Today’s frontline teams work beyond the office — in warehouses, healthcare facilities, vehicles, job sites, and remote locations. They need devices that won’t fail and connectivity that doesn’t slow them down.

Premier Wireless delivers **Zebra rugged devices powered by T-Mobile’s nationwide 5G network***, giving organizations a reliable, enterprise-ready mobility solution designed for real-world conditions.

What These Devices Do Best

Built for Demanding Environments

Zebra devices are designed to withstand drops, dust, moisture, heat, and cold — making them ideal for nonstop, mission-critical use.

Stay Connected Wherever Work Happens

With nationwide 5G coverage across millions of square miles and most major roadways, teams stay connected whether they’re inside facilities, on the road, or in remote locations.

Support Real-Time Workflows

From scanning and data capture to secure communication and application access, these devices support the tools teams rely on to work efficiently and accurately.

**Coverage not available in all areas. We’ll help you confirm availability at your location.*

Key Benefits

Reliable Performance

Purpose-built hardware that holds up to daily wear, long shifts, and tough conditions.

Secure, Always-On Connectivity

Consistent cellular connectivity for teams who can't depend on Wi-Fi alone.

Enterprise-Ready Mobility

Designed to support business-critical apps, workflows, and data — without consumer-device limitations.

Best Use Cases - Ideal for Teams That:

- Work in **warehouses, distribution centers, and logistics**
- Support **healthcare, home health, or field services**
- Operate **fleet, transportation, or delivery operations**
- Rely on **mobile scanning, data capture, or real-time communication**
- Need **durable devices with dependable connectivity**, not consumer-grade phones

Why Premier Wireless

Premier Wireless helps organizations deploy complete connected-device solutions — not just hardware.

We support you with:

- ✓ Device and plan recommendations based on real workflows
- ✓ Scalable deployments as teams grow
- ✓ T-Mobile connectivity configured for your environment
- ✓ Ongoing support and lifecycle management

Power Your Frontline with Devices That Work as Hard as They Do
