

Always-On Safety & Security for Modern Hotels

Reliable surveillance to protect guests, staff, and property
—without interruption.

The Problem

When hotel surveillance systems go offline, your property loses visibility at the exact moment it matters most.

- Incidents go unrecorded.
- Security teams lose real-time awareness.
- Guest and staff safety is put at risk.
- Property damage and liability increase.

Most camera systems rely entirely on local power and internet — creating a single point of failure.

The Solution

Premier Wireless delivers HD camera systems with built-in cellular connectivity and AI-powered monitoring — ensuring continuous visibility across guest areas, staff spaces, and exterior zones. If power or internet fails, cellular backup keeps your cameras online and recording without interruption.

Key Capabilities

- ✔ Continuous property-wide visibility
- ✔ Faster response to incidents and security threats
- ✔ Protection for guests, staff, and assets
- ✔ Recorded video for incident review and liability protection
- ✔ Reliable surveillance — even during outages

How It Works

Katalyst AI-Powered Cameras

- ✓ HD video monitoring with AI motion and intrusion detection
- ✓ Cellular backup maintains operation during outages
- ✓ Secure cloud storage for remote viewing and playback
- ✓ Real-time alerts improve response time

No blind spots. No lost footage. No gaps in protection.

Protect what matters most — with surveillance that never goes offline.
