

Retail Payment Solutions

Modern retail payments. Anywhere your customers are.

Retail businesses process payments across multiple locations — from checkout counters and pop-up shops to mobile associates on the sales floor. Traditional POS systems tied to fixed counters or Wi-Fi networks can slow transactions and limit flexibility.

Premier Wireless delivers Elo Pay and secure iPad POS systems powered by T-Mobile 5G, enabling retailers to accept secure, real-time payments anywhere in the store or across multiple retail locations.

POS Options Available:

All-in-one mobile payment device designed for flexible retail operations.

Perfect For:

- Mobile checkout
- Line busting during peak hours
- Pop-up stores and events
- Sales floor associates

Elo Pay
(Portable Smart Terminal)

Tablet-based POS system for retail counters, mobile associates, and store operations.

Ideal For:

- Checkout counters
- Customer service desks
- Mobile sales associates
- Retail events and pop-ups

iPad POS + Secure Card Reader

Key Features:

- ✔ Accept EMV, tap-to-pay, and mobile wallets
- ✔ 5G cellular connectivity — no reliance on store Wi-Fi
- ✔ Real-time digital receipts and transaction reporting
- ✔ Secure, encrypted payment processing
- ✔ Portable and easy to deploy across locations

Retail Benefits:

- Reduce checkout wait times during peak shopping periods
- Enable mobile checkout anywhere in the store
- Support pop-up retail and event sales
- Keep transactions running if store Wi-Fi fails
- Improve customer experience and purchase speed
