

Getac Flock Safety INTEGRATION

Built for what's next, the Getac and FlockOS™ integration evolves with your agency—seamlessly expanding as your technology, teams, and mission grow.

INTEGRATED REAL-TIME INTELLIGENCE Powered by FlockOS™

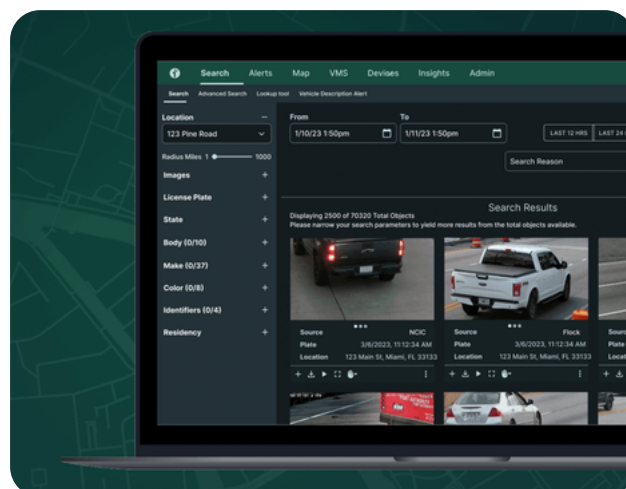

Experience the future of real-time intelligence with the partnership between Getac Video Solutions and Flock Safety. Getac manufactures the most reliable video system in the police industry, and Flock Safety is one of the most respected technology companies providing RTCC and ALPR. By sending location, status, live streams, and license plate recognition (LPR) from your Getac in-car system or Getac BC-04 4K body-worn camera to FlockOS, you get a single, comprehensive view that drives faster decisions and more effective outcomes.

REAL-TIME INTELLIGENCE IN ACTION

When every second matters, Getac Video and Flock deliver. The Getac VR-X20 AI DVR, coupled with the Getac NF42 AI front-facing LPR camera, produces live video, LPR hits, and audio triggers directly through FlockOS—giving your team the ability to respond in the moment. This integration ensures your workflow is optimized to keep you ahead. Adding Getac's AI endpoints to all cameras connected to FlockOS provides command staff full visibility into everything happening in the field.

UNLOCK CRITICAL INSIGHTS FROM THE PAST **FASTER** with Getac + Flock

Need to review an incident or follow up on a lead? The Getac and Flock integration simplifies the process. With centralized access to synchronized video, audio, and data across Getac's BC-04 4K AI body-worn cameras, in-car systems, and Flock's stationary cameras within your jurisdiction, you can search, filter, and find what you need in seconds.

BUILT TO SCALE DESIGNED FOR SIMPLICITY

The Getac + FlockOS™ integration is engineered to grow with your agency. Whether you're expanding your fleet of Getac BC-04 4K body-worn cameras or Getac VR-X20 in-car video systems, connecting new LPR data streams, or onboarding additional partner technologies, scaling is seamless. No rework. No downtime. Just a platform that adapts to your evolving needs—on your terms.

WHAT Getac + FlockOS™ OFFERS:

✓ **Faster deployments**

with little to no disruption to your existing operations. Getac and Flock offer deployment services, ensuring the solution works as intended.

✓ **Streamlined workflows**

across officers, command staff, and partner agencies.

✓ **Connected intelligence**

that strengthens collaboration and improves situational awareness across jurisdictions.

TRUSTED SECURITY TRANSPARENT CONTROL

Your data is only as valuable as it is secure. With Getac and Flock, security and transparency are built in from the ground up. Role-based access, detailed audit trails, and enterprise-grade data governance ensure you remain in control—empowering your agency to operate with confidence, accountability, and trust. Getac and Flock guarantee that any data your agency produces is fully owned by your agency. No hidden policies. No surprise restrictions. Just complete control over how your information is stored, accessed, and shared. It's your data, and it stays that way.

DELIVERING SMARTER SOLUTIONS FOR LAW ENFORCEMENT

The Getac + FlockOS™ integration delivers industry leading reliability, real-time intelligence, streamlined workflows, and complete data ownership. From the initial incident to the final report, you'll have the tools to respond faster, work smarter, and protect your community with confidence.
