SONIM XP5plus 5G

A better way to two-way.

Today's teams go more places than ever—and staying connected is non-negotiable. Government agencies, fleet operators, and Fortune 500 companies continue to choose the XP5plus series for its future-proof flexibility, rock-solid reliability, and purpose-built features their crews depend on every day.

Unlike traditional LMR radios, the XP5plus 5G uses 5G cellular architecture that provides virtually limitless range and coverage, ensuring teams stay connected wherever the mission takes them. With Mission-Critical PTT, plus voice calling and SMS that can be enabled or locked down in kiosk mode, the XP5plus 5G delivers fast, secure, seamless communication across teams, agencies, and devices.

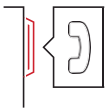

Engineered to survive the toughest environments, it withstands against water, drops, dust, and extreme conditions. With eSIM, more memory, and faster charging, the XP5plus 5G keeps your teams connected when it matters most.
