

CPR³ THE 5G COMMAND CENTER

Modernize emergency response and campus leadership—beyond binders and clipboards.
When networks fail, your leaders can't.

The New Standard In School Safety

When emergencies happen, every second counts — and outdated systems often create confusion and delay. The 5G Command Center, developed by Premier Wireless and powered by T-Mobile's 5G network, gives administrators and district leaders a virtual office on the go, keeping them connected and in control when it matters most.

This secure, preloaded tablet provides instant access to the critical tools that power your school's operations: attendance, communication, safety alerts, and parent engagement. Whether you're in the building or outside during an evacuation or reunification, you'll have the information and connectivity you need to lead with confidence.

The Problem

Outdated tools create dangerous communication gaps when response time matters most.

- ✗ 490 total violent incidents were recorded in K–12 schools during the 2024–25 school year.
- ✗ Educators triggered 183,000+ safety alerts in one school year—a 40% increase from the previous year.
- ✗ During high-traffic moments, district networks can clog or fail, leaving leadership without communication.
- ✗ Paper rosters and clipboards are often outdated before the drill even begins.
- ✗ Staff often rely on personal phones and disconnected apps to communicate, increasing risk and confusion.

When chaos strikes, outdated systems slow response and hinder accountability—putting students and staff at risk.

The Solution

- ✓ The 5G Command Center replaces paper rosters and disconnected systems with a single, connected platform designed for emergency management and operational continuity.
- ✓ Built and preloaded by Premier Wireless, each device unites your district's essential systems—student data, alerts, communication, and parent outreach—on one secure, 5G-powered tablet.

One device. One dashboard. Total command—wherever you are.

Why it Matters

It's time we move beyond binders and clipboards.

When emergencies strike, leadership can't rely on outdated systems or guesswork.

The 5G Command Center transforms crisis management into a coordinated, data-driven process—giving your team the clarity, connectivity, and confidence to act decisively when every second matters.

Key Benefits

Always Connected

Powered by T-Mobile 5G, ensuring uninterrupted access and communication when district Wi-Fi or internal networks fail.

Real-Time Access

Instant visibility into student data, attendance, and parent contact information—no clipboards or manual lists required.

Unified Communication

Integrates your existing safety, attendance, and communication tools in one secure command center—keeping administrators, security, and staff aligned.

Operational Continuity

Maintain leadership, accountability, and communication from anywhere on campus during districtwide outages.

Your 5G Command Center Built By Premier Wireless Powered by T-Mobile

With over 30 years of experience delivering connected solutions for education and public safety, Premier Wireless designs, configures, and delivers each 5G Command Center to your district's exact specifications.

Each device arrives fully preloaded, connected, and ready to perform—powered by T-Mobile's nationwide 5G network for unmatched reliability.

**When every second counts, stay connected, informed,
and in control.**
