

Turn Your Existing Bus Cameras Into Always-On Connected Cameras.

Already Have School Bus Cameras? But Lack Real-Time Camera Access?

Many school districts already have camera systems installed on their buses—but the video only becomes accessible once the bus returns to the yard.

ConnectED Vision™ transforms existing school bus cameras into connected, always-on video systems by adding a rugged cellular router—without replacing your current cameras or DVR.

Powered by the InHand IR624 router and T-Mobile's nationwide 5G network, districts gain secure remote access to live video, faster incident response, and improved visibility—all while leveraging their existing camera investment.

Why ConnectED Vision?

- ✓ Keep your existing cameras
- ✓ Live video while buses are in service
- ✓ Reliable nationwide 5G connectivity
- ✓ No costly camera replacement
- ✓ Rugged InHand IR624 router
- ✓ Fast installation with minimal disruption

Why School Districts Choose It

Improve student safety

View incidents while buses are on route—not hours later.

Respond faster

Access video remotely when every minute matters.

Reduce upgrade costs

Add connectivity instead of replacing hardware.

Protect your existing investment

Modernize your fleet without replacing working camera systems.

Brought to you by Premier Wireless, powered by T-Mobile + InHand IR624

Modernize your existing school bus cameras—without replacing them.
