

EverLink for Utilities & Storm Response Connectivity When the Grid Is Down

A vehicle-based connectivity solution designed to keep crews, command teams, and critical systems online — even when infrastructure is damaged or offline.

Storms don't just disrupt power— they take connectivity down with it.

- Towers fail or lose power
- Networks become congested
- Crews operate in damaged infrastructure zones

That's when communication is most critical.

What is Everlink for Storm Response?

A fully integrated in-vehicle platform combining LTE/5G, Wi-Fi, and optional satellite — delivering resilient, always-on connectivity for utility fleets in the field.

What's Included

- Peplink BR1 Pro Router
- MAX S Vehicle Antenna
- Starlink Mini
- Vehicle-mounted system
- Multi-network failover platform
- Professional installation available

Why utilities rely on Everlink

✓ Always-On Field Operations

Keep crews connected during outages and restoration efforts

✓ Support Critical Systems

Maintain access to mapping, dispatch, and reporting tools

✓ Built-In Network Redundancy

Automatic failover when cellular networks degrade or fail

✓ Secure, Managed Network

Centralized visibility across all field units

Use Cases

Storm restoration
crews

Rural utility
operations

Emergency
response teams

Grid maintenance
and inspections

When the grid goes down, your connectivity shouldn't.
