

Connected RPM Solution for Tribal Healthcare Organizations

Many tribal healthcare organizations face unique challenges delivering consistent chronic care across rural, underserved, and geographically dispersed populations.

Connectivity limitations, staffing shortages, transportation barriers, and ongoing chronic disease management needs can make **continuity of care difficult to sustain between visits.**

VeraSync™ from Premier Wireless helps tribal clinics and healthcare organizations **expand connected care access through cellular-connected Remote Patient Monitoring (RPM) infrastructure** powered by T-Mobile's nationwide network.

Designed to simplify patient participation and reduce operational burden, VeraSync™ helps healthcare teams improve visibility between visits while supporting scalable, reimbursement-ready care programs.

VeraSync™ Solutions

VeraSync Connect™

Cellular-connected RPM infrastructure designed for reliable monitoring without dependence on home Wi-Fi

VeraSync Insight™

Centralized visibility platform for patient monitoring, prioritization, and workflow coordination

VeraSync Nurse Navigator™

Optional U.S.-based licensed nursing support for patient outreach, engagement, monitoring, and escalation workflows

Key Benefits for Tribal Healthcare Organizations

Improve continuity of care between visits
with cellular-connected monitoring devices

Support chronic disease engagement
across remote communities without requiring home Wi-Fi

Simplify participation for elders and Medicare populations
through easy-to-use patient experiences

Improve visibility into patient health trends
with centralized monitoring and workflow coordination

Expand connected care capacity
without significantly increasing internal staffing burden

Support operational scalability
with reimbursement-ready workflows and optional licensed nurse support

Strengthen connectivity reliability in rural environments
through T-Mobile's nationwide network

Reduce operational complexity
while improving long-term patient engagement

Clinical Outcomes

Across active monitored patient populations:

Systolic readings at goal range improved from

31% → 39%

High-critical systolic readings reduced by

23.5%

Average RPM engagement exceeded

17 months

Because connected care works best when programs are simple, sustainable, and built around real patient environments.

Powered By Premier Wireless + T-Mobile's Nationwide Network
