PREMIER WIRELESS™

T-MOBILE FOR BUSINESS
REGISTERED PARTNER

Stay Connected. Stay Informed. Stay Ready.

Reliable, prioritized connectivity built for law enforcement, from the patrol vehicle to the officer in the field.

Traffic stops. Major incidents. Special events. Rural calls. Emergency response. Officers depend on real-time access to critical information wherever duty takes them. EverLink + T-Priority™ help keep patrol vehicles, officers and command connected when networks are congested, coverage is limited or conditions change.

Connectivity Built for the Mission

Keep Critical Data Moving

Major incidents, emergencies and large public events can overwhelm cellular networks. T-Priority™ provides eligible first responder traffic with priority and preemption, helping officers maintain access to critical applications and information during congestion.

Stay Connected Beyond a Single Connection

Rural patrol areas and emergency situations can take officers beyond reliable cellular coverage. EverLink can switch to another available connection, including satellite when equipped and activated, providing an alternate path when the primary connection is unavailable.

Keep Critical Systems Within Reach

Support connected laptops, tablets and compatible applications used for CAD, RMS, mapping and other mission-critical information from the patrol vehicle.

Give Command Greater Visibility

Support compatible cameras, video systems and other connected technology with the broadband connectivity needed to share information from the field and improve situational awareness.

Create Connectivity Where the Response Happens

An appropriately equipped patrol or command vehicle can provide a shared connection for authorized devices, helping establish a connected coordination point during major incidents, investigations and temporary command operations.

5959 Corporate Drive, Suite 1225, Houston, TX 77036

From the Patrol Vehicle to the Officer

T-Priority

Priority when networks are under pressure.

Priority and preemption for eligible first responder traffic on T-Mobile's network helps keep critical communications and data moving during periods of heavy network congestion.

T-Satellite with STARLINK

Extend connectivity beyond traditional coverage.

Compatible devices can access satellite connectivity in areas where terrestrial cellular coverage may be unavailable, helping extend connectivity beyond the patrol vehicle.*

When the Situation Changes, Stay Connected to the Information That Matters.
