

Always-On Connectivity for Mission-Critical Public Safety

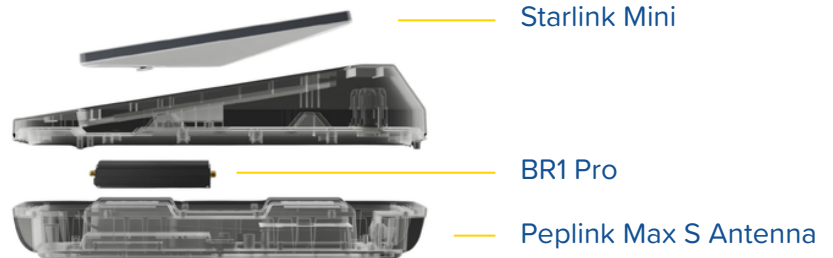

A fully integrated cellular + satellite connectivity solution built to keep first responders connected — anywhere, anytime.

What Is EverLink?

EverLink is a public-safety-ready connectivity system that blends cellular, Wi-Fi, and satellite into one always-on solution — protecting mission-critical communications from outages, disruptions, and network failures.

What's Included

- Starlink Mini Satellite System
- Peplink BR1 Pro Enterprise Router
- MAX S High-Performance Antenna
- Integrated Multi-Network Hardware Platform
- Professional Installation Available
-

Why Organizations Rely on EverLink

✓ Always-On Operations

Protect critical systems during outages and disruptions.

✓ Connectivity Without Limits

Reliable service in urban, rural, and remote environments.

✓ Deploy Anywhere, Without Limits

Built for vehicle, fixed installations, or portable Kits.

✓ Enterprise-Grade Security

Advanced encryption and network controls.

✓ Fast, Flexible Deployment

Quick setup for permanent and temporary locations.

✓ Built-In Network Resilience

Automatic failover between fiber, cellular, and satellite.

Built for Public Safety Operations

Public Safety teams don't share the network — they get an extra lane.

When seconds matter, connectivity cannot compete with consumer or commercial traffic. EverLink is engineered to harden public safety networks with layered redundancy, priority routing, and automatic failover — ensuring responders stay connected when infrastructure fails.

What this means for Public Safety teams:

Priority Network Access

First responders operate on T-Mobile's T-Priority network, designed to maintain performance during congestion, disasters, and large-scale incidents.

Built-In Redundancy & WAN Failover

Automatic failover between fiber, LTE/5G, and satellite keeps CAD, RMS, dispatch, and command systems online — even during ISP outages.

Always-On Command & Response

Maintain communications for EOCs, mobile command units, stations, and temporary incident sites without worrying about network outages or congestion.

Deploy Anywhere, Instantly

Rapid setup for fixed facilities, vehicles, and temporary response zones — urban, rural, or remote.

Network Resilience for Critical Moments

- ✓ Integrates Fiber, multiple carriers+ Satellite
- ✓ Eliminate Downtime During Internet Outages
- ✓ Centralized Network Management
- ✓ Mobile & Fixed Deployments
- ✓ IP67 Rugged Enclosure
- ✓ Scalable Across Locations

**T-Mobile data plan and Starlink service sold separately*
