

EverLink Mobility for Fire & Rescue Connectivity That Holds When Everything Else Fails

A vehicle-based connectivity solution designed to keep fire apparatus, command teams, and responders connected — even when networks are overloaded, damaged, or unavailable.

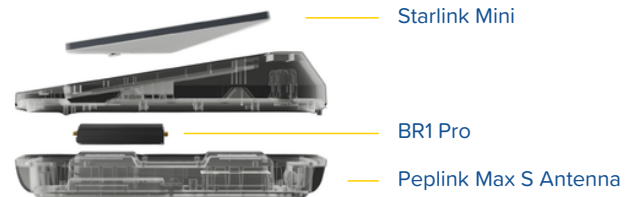

What is Everlink for Fire & Rescue?

EverLink is a flexible connectivity ecosystem that provides reliable internet access and communications in virtually any environment—from permanent facilities and vehicle fleets to remote sites, field operations, and portable deployments—ensuring continuous communication and operational continuity in the most demanding environments.

Fires don't happen where connectivity is reliable. And when they do, networks often fail.

- Towers become congested
- Infrastructure is damaged
- Coverage drops in remote or rural areas

That's when communication matters most.

What's Included

- Peplink BR1 Pro Enterprise Router
- MAX S High-Performance Vehicle Antenna
- Starlink Mini
- Vehicle-mounted connectivity system
- Integrated multi-network platform
- Professional installation available

Why fire departments rely on Everlink mobility

✓ Always-On Incident Connectivity

Maintain communication between apparatus, command, and dispatch — even during outages or congestion.

✓ Built-In Network Redundancy

Automatic failover between cellular and satellite ensures connectivity when primary networks fail.

✓ Support Critical Systems in Real Time

Keep CAD, mapping, incident reporting, and communication tools online at all times.

✓ Secure, Managed Network

Encrypted, reliable connectivity across every vehicle and response unit.

Where Everlink for fire & rescue makes the difference

Wildland fire response (remote terrain)

Structure fires with network congestion

Disaster response & large-scale incidents

Rural fire districts and mutual aid zones

Mobile command units and incident command posts

Deployment strategy

✔ Cellular-First Deployment

Best for:

- Urban response areas
- Daily operations

✔ Hybrid Deployment (Cellular + Satellite)

Best for:

- Wildland fire
- Rural districts
- Disaster response
- Large-scale incidents

Ensures communication when infrastructure is compromised

When networks fail, response cannot.

Built for public safety network priority

- ✔ Operates on T-Mobile's priority network (T-Priority)
- ✔ Maintains performance during congestion and emergencies
- ✔ Designed for first responder communication environments

Proven performance features

- LTE/5G + Starlink Mini
- Automatic failover between networks
- Vehicle-ready rugged hardware
- Real-time connectivity for field operations
- Centralized fleet management
- Scalable across departments and regions

From dispatch to the fireground— connectivity stays with your team.

Keep Fire & Rescue Teams Connected — No Matter the Conditions
