PREMIER WIRELESS™

T-MOBILE FOR BUSINESS
REGISTERED PARTNER

Connected When the Mission Can't Wait

Reliable, prioritized connectivity for first responders — in the vehicle and in the field.

When every second matters, losing connectivity isn't an option. EverLink + T-Priority™ help keep critical communications, applications and information moving — even when networks are congested, coverage is limited or conditions change.

Keep Your Response Connected

Stay Connected Through Congestion

Emergencies and large-scale events can overwhelm public networks. T-Priority™ provides eligible first responder traffic with priority and preemption, helping critical data get through when networks are crowded.

Extend Connectivity Beyond a Single Connection

Rural incidents, severe weather and outages can interrupt primary connectivity. EverLink can switch to another available connection, including satellite when equipped and activated, helping keep vehicle systems online.

Give Command Greater Visibility

Support compatible cameras, drones and video systems with the broadband connectivity needed to provide command with live information from the field.

Connect EMS on the Move

Support compatible medical devices, patient-care applications and telehealth tools, helping EMS teams securely share critical information before reaching the hospital.

Create a Connected Command Point

Turn an appropriately equipped response vehicle into a connectivity hub for authorized laptops, tablets and other devices at staging areas and incident scenes.

5959 Corporate Drive, Suite 1225, Houston, TX 77036
