

THE COMMUNICATION HUB – POTS LINE REPLACEMENT

More Than a Phone Line

Why POTS Replacement Can't Wait

- ✓ **FCC Mandate:** POTS lines are being phased out—cellular is the future.
- ✓ **Rising Costs:** Maintaining aging copper lines is increasingly expensive.
- ✓ **Compliance Risks:** Legacy systems often fall short of PCI, HIPAA, and NFPA 72 standards.
- ✓ **No Upgrade Path:** Copper lines won't be modernized by carriers.
- ✓ **Operational Risks:** Outdated lines have higher failure rates, limited visibility, and greater vulnerability.

The Communication Hub: POTS Replacement + More

Designed for organizations that need safety, compliance, and digital access — all in one device.

Key Features:

- **E911-Compliant Calling:** Accurate location information for emergencies
- **Built-in Wi-Fi Hotspot:** Keep staff and devices connected
- **7" Touchscreen:** For calls, texts, apps, and email
- **Battery Backup:** 2000mAh built-in for power outages
- **Secure Connectivity:** Optional encrypted network for added protection
- **Scalable:** From single line to full office phone system, it's built for flexibility.

Perfect for schools, government, healthcare, senior living, small businesses, and remote workers who need simple, reliable communication

Why Choose the Communication Hub

- It consolidates phone, messaging, and internet into one powerful solution
- It ensures emergency systems remain online during power or network outages
- It adds value beyond POTS replacement by enabling digital communication tools
- It scales easily for campuses, multi-building facilities, or remote operations

Modernize Your Communication Today

Stay connected, compliant, and future-ready.
